

Software Requirements Specification (SRS) - MVP

1. Introduction

Minimum viable implementation of the Innovation Platform focusing on the core workflow.

2. Scope

Supports idea submission, coordinator review, evaluator assessment, committee decision, and status tracking.

3. Workflow

Draft → Submitted → Initial Review → Under Evaluation → Committee Review → Approved / Rejected / Returned

4. User Roles

- Employee: Submit ideas and track status.
- Innovation Coordinator: Review and forward/return ideas.
- Evaluator: Score assigned ideas and recommend.
- Committee Member: Approve, reject or return ideas.
- Administrator: Optional demo/login support.

5. Functional Requirements

Authentication

- Login with role-based dashboard

Idea Management

- Create draft
- Submit idea
- View own ideas/status

Initial Review

- Forward or return submitted ideas

Evaluation

- Score Business Impact, Innovation, Feasibility
- Add comments
- Submit evaluation

Committee

- Approve, Reject or Return

6. Validation & Business Rules

- Title, Category and Description are required.

- Employees edit only drafts/returned ideas.
- Coordinator review before evaluation.
- Reject/Return requires comments.

7. Non-Functional Requirements

- Role-based access control.
- Responsive UI.
- Fast page loading.
- Clear validation messages.
